50th Annual Conference and Exposition only 13-days away

This year’s conference hosts – Fort Lauderdale Hollywood International Airport, North Perry Airport and Fort Lauderdale Executive Airport – are putting the final touches on an outstanding 50th Anniversary Conference. In addition to CFASPP on Saturday and a welcome party at FXE Saturday evening, the conference will host meetings for all standing committees on Sunday, a warm and welcoming opening reception and a banquet honoring past presidents and leaders in the evening. The Host Planning committee has developed an outstanding schedule of industry, business and motivational sessions Monday through Wednesday.

Be inspired and network in style at the Museum of Discovery and Science. Located in downtown Fort Lauderdale, the museum is one of the largest of its kind in Florida and has the most visitors of any museum in the state. Enjoy tropical entertainment and “Floribbean” cuisine in an interactive space where you can channel your inner-explorer. This event’s theme will be Polynesian, so make sure arrive to sporting your favorite Hawaiian attire!

Welcome FAC
Opening Reception

| Boarding: | 7:00PM (from Marriott Harbor Beach Resort) |
| Arrival:  | 7:30PM (Museum of Discovery & Science) |
| Departure:| Buses begin loading at 9:00PM (to Marriott Harbor Beach Resort) |
| Attire:   | Polynesian / Resort Casual |

Florida Airports Council
Conference & Exposition | August 4-7 | Fort Lauderdale
Earlier this year, FAC challenged airport and corporate members to show their pride and creativity by participating in the 50th Anniversary Commemorative Poster Competition. Twenty-four posters were submitted by 18 airport and corporate members. They are all fantastic!

In May, FAC announced the opportunity to vote for your favorite to all members. One-hundred seventy-nine members voted and the tabulations are shown below:

- **Honorable mention goes to KEITH with 8.4% of the vote and Lee County Port Authority with 7.3% of the vote.**

**Congratulations to all and Thank You for participating and making the 50th Anniversary of the Council memorable!**

- **ADK Executive Search with 24% of the vote**
- **Jacksonville Aviation Authority with 10% of the vote**
- **Hypower, Inc. with 9.5% of the vote**

Honorable mention goes to KEITH with 8.4% of the vote and Lee County Port Authority with 7.3% of the vote.

**Corporate Committee announces CEU Courses**

The Corporate Committee will be hosting two CEU classes on Sunday August 4th beginning at 2:00 P.M.

**Session 1: “Role of AV Technology at Airports”**

Connected and Automated Vehicle Technology is emerging rapidly across all facets of the transportation world. These emerging transportation technologies promise to transform how all modes of transportation are approached; local urban street networks, highways and freeways, transit, rail...and air! Developing applications of this technology are expected to change travel patterns, vehicle ownership and use and commercial freight operations, and may challenge the norms and “status quo” of how we view the overall transportation network. While some of these technologies are available today, it may still be decades before most of the benefits of some of these technologies are realized; but no doubt, the transportation landscape IS changing. This presentation will:

- Provide a background on Connected Vehicle and Automated Vehicle technology
- Provide a realistic outlook of adoption timelines of the technology
- Discuss how CV and AV solutions can help solve issues on airport landside operations
- Discuss what airports can do NOW to prepare for CV/AV.

**Session 2: “Consultant Roles in developing Airport Infrastructure”**

Recent changes in Florida Statutes from House Bill 905 have defined distinct roles for design professionals and construction administration for infrastructure funded by the Florida Department of Transportation. This panel of FDOT, FAA and consultants’ representatives will discuss the impact of these revised roles with FAA General Provisions, Technical Specifications, other Florida Statutes, professional liability, and consultant selection/scope of services.

**FAC Conf App will include new features**

FAC will have a full service application ready for your personal device. Be sure to download the app when you pick up your credentials. In addition to the full program agenda and schedule, roster of attendees, list of exhibitors and sponsors, we have a few new and exciting features coming this year.

- The Exhibit Hall Passport will now be part of our App. As you visit our exhibitors be sure to get your badge scanned - you will receive points for every booth you visit. On Wednesday, August 7th during the Leadership Luncheon, there will be a drawing for Round Trip tickets on Southwest Airlines among the delegates who have the most points.
- After Session Feedback - We will also be incorporating the ability to provide feedback about the session as soon as the session is completed. Please take the time to provide your input – it will help us with our program next year.
Support Florida aviation students - Education Foundation donors offer outstanding packages

Each year, the Education Foundation sponsors the Silent and Live Auction to raise money in support of scholarships and internships for Florida aviation students. Last year, the Foundation raised $16,377 at the 2018 annual conference in Tampa, FL. Check out the list below and plan to visit the Silent Auction just outside the Exhibit Hall Grand Ballroom on the 3rd floor.

Amazon’s hub predicted to net $111.7M for Lakeland

Gene Conrad, director of Lakeland Linder International Airport, announced a 20-year contract with Amazon to construct a 285,000-square-foot cargo complex at the airport in May.

The first question city officials were asked when news broke that Amazon was building an air cargo complex in Lakeland was how the project would benefit area residents. The calculations are in. Gene Conrad, director of Lakeland Linder International Airport, said he predicts the Amazon hub will net $111.7 million in revenue for the city over the next 30 years. “This is a very conservative estimate on our part because we don’t want to over promise and under deliver,” he said.

Conrad announced a 20-year contract with Amazon to construct a 285,000-square-foot cargo complex at the airport on May 17. The company will pay the city about $80,000 a month to lease 47.2 acres, with an option to renew the lease three times at 10 years each, for a total of 50 years. The company will also pay the airport 85 cents per 1,000 pounds of cargo landed at the airport, and a 3-cent surcharge per gallon of fuel.

Conrad estimated the city will receive $66.7 million in revenue during the first 20 years of the lease. More than half of the total proceeds are expected to be generated by the monthly lease payments. “Those are very conservative numbers as far as what we’re showing, as we’re only showing 10 departures a day — which we believe is going to grow over time,” he said.

The airport director also projects that Amazon will activate at least one of the three 10-year extensions built into their lease. If so, it will bring in another $45.1 million in revenue. “Excellent, these are the types of deals we love to see,” Mayor Bill Mutz said. To uphold its end of the deal, the airport is expected to upgrade the landing systems at the airport, add five fuel tanks and improve one of the runways in preparation for Amazon’s arrival. The projects have an estimated cost of $44.9 million.

The city has already secured $37.5 million in state and federal grants to help cover these expenses. Lakeland Linder will be responsible for paying $7.4 million, or 16.5%, of the upgrades.
“It’s a big deal for the airport,” Conrad said. “The lease is executed; the ink is dry. They are already under construction.”

Landing the Amazon deal has also been a major influence in helping the airport advance its long-term plan to revamp its runways, according to Conrad. Lakeland Linder has a 20-year master plan that aims to expand the current runway, add a parallel runway to the existing one, and build out its terminals, hangers and parking.

“Getting the Amazon deal done and inked has helped all these things move forward,” Conrad said.

The airport director said he has a meeting slated with American Airlines this fall to further discuss the opportunity of bringing commercial flights to Lakeland Linder. Conrad said he’s spoken to American officials about having two to three flights a day from the city to their hub in Charlotte, North Carolina, where the airline is expected to add gates by the spring of 2021.

“They want to feed the beast, feed their hub and this is our opportunity,” he said.

**For sale: Florida airpark with longest private runway in the U.S.**

A Florida airpark that boasts the longest private runway in the United States is up for sale. Jumbolair, which includes Jumbolair Aviation Estates, the former Muriel Vanderbilt mansion, a warehouse/manufacturing complex, horse stalls, and more, is on the market for $10.5 million.

Jumbolair Aviation Estates includes 38 private aviation homes, including one owned by actor John Travolta. All homes have access to the 7,550’ runway.

“Getting the Amazon deal done and inked has helped all these things move forward,” Conrad said.

The airport director said he has a meeting slated with American Airlines this fall to further discuss the opportunity of bringing commercial flights to Lakeland Linder. Conrad said he’s spoken to American officials about having two to three flights a day from the city to their hub in Charlotte, North Carolina, where the airline is expected to add gates by the spring of 2021.

“Their plan is to feed the beast, feed their hub and this is our opportunity,” he said.

“This is a tremendous property — Jumbolair has such a colorful history,” said Bartow McDonald IV, managing director of SVN Florida, which is handling the sale of the property. “It’s a point of departure for all kinds of private and business travel. The runway is so large it can accommodate a Boeing 747 Jumbo Jet.”

Back in the 1970s, a Vanderbilt horse farm occupied the land. But Arthur Jones, who invented the Nautilus line of exercise equipment, acquired the property and set up — among other things — a refuge for African wildlife, including elephants, rhinos, crocodiles, and a silverback gorilla named Mickey. His ex-wife, Terri Jones, turned the property into an aviation community a decade later.

“This is the place for someone with a passion for aviation who wants to be part of an exciting, vibrant community,” McDonald said. “This property is also in the heart of thoroughbred horse country. Ocala is the horse capital of the world, and the World Equestrian Center is just a short distance away — perfect for someone in the market for an equestrian estate.”
Remembering the epic summer of 1969
(Source: Herald-Tribune)

Whether you remember the day the Earth stood still on July 20, 1969, or if you have only the dimmest recollection of the Twin Towers going down on 9/11, the spectacle of Apollo 11 is as surreal now as it was 50 years ago.

In fact, the anniversary seems almost cruel in its reminder of how, once upon a time, in spite of itself, as America was tearing its foundations apart during an unpopular and unwinnable war, Emma Lazarus’ “New Colossus” managed to attain full stature by planting the star-spangled banner on the surface of the moon.

Reruns show Earthlings in every corner of the world, transfixed, massing before giant screens in public parks and small screens in saloons, clustering before display-window TV sets or huddled over radios. Phantom images of Neil Armstrong and Buzz Aldrin after they emerged from the Eagle were grainy, ghostly, the lunar desert X-rayed through their space suits. Some 240,000 miles away, audiences exhaled and cheered, then dried their eyes over the triumph of life.

“I was flabbergasted,” Apollo 11 command module pilot Michael Collins told CBS recently as he recalled the astronauts’ ensuing world tour. “I thought that when we went some place, they would say, ‘Well, congratulations, you Americans finally did it.’ And instead of that, unanimously, the reaction was, ‘We did it. We humans finally left this planet — we did it!’”

There were notable exceptions; in a repudiation of what they dismissed as a propaganda stunt, the Soviet Union and Mao’s China refused to broadcast the American epic. Even so, an estimated 650 million people, or one out of five human beings, bore witness as NASA installed a plaque declaring that “we came in peace for all mankind.” By 1972, it was over. The United States never went back.

But if, as a media studies professor claims, Apollo 11 was the crowning moment for America’s “establishment culture” — reflected most notably in wide-angle shots of engineers arranged in rows of crewcut, middle-aged, buttoned-down, lily-white conformity — within weeks of that extraterrestrial adventure, something else even more fleeting, more unanticipated, but no less idealistic commanded headlines.

Lawmakers propose Bill to eliminate PFC cap

Reps. Earl Blumenauer (D-Ore.) and Thomas Massie (R-Ky.) have introduced a bipartisan bill to eliminate the federal cap on PFCs. In exchange for an unlimited PFC, the Blumenauer-Massie bill (H.R. 3791) proposes to cut AIP funding by $400 million annually and eliminate entitlements for large hub airports. Under current law, large and medium hubs already turn back 75 percent of their entitlements for imposing a $4 or $4.50 PFC.

Rep. Peter DeFazio (D-Ore.), who was then the Ranking Member of the Transportation and Infrastructure Committee, and Massie introduced a similar bill in 2017 to eliminate the PFC cap and reduce AIP funding. Blumenauer was one of 13 lawmakers who cosponsored that legislation, which never was considered by the committee or the full House.

DeFazio, who now is chair of the Transportation Committee, has suggested that he may still move ahead with his own legislation to adjust the PFC cap. However, he has indicated support for a more modest approach that may call for raising the PFC cap to a certain amount and possibly adjusting it for inflation, instead of eliminating the cap entirely. ACI-NA President and CEO Kevin Burke also commented on the new bill saying it “will remove the outdated and burdensome federal cap on local airport user-fees, allowing each airport to determine its own user-fee rate based on its own unique infrastructure needs.”

ERAU, Volusia County aim to land piece of growing space industry

Fifty years after the Apollo 11 put men on the moon, Volusia County is taking giant steps to play a role in today’s race for space. Led not by NASA but rather commercial spaceflight ventures such as Elon Musk’s SpaceX and Jeff Bezos’ Blue Origin, the new space industry is already generating significant launch activity at Cape Canaveral, located about 60 miles south of Daytona Beach. That is creating more economic development opportunities for Volusia County. “With all the growth in space activity at the Cape comes the need for a lot of supporting businesses, the
suppliers and operations-type people,” said Dr. Barry Butler, president of Embry-Riddle Aeronautical University, which counts seven astronauts as alumni. “Volusia County is well suited for that.”

The increase in aerospace activity here is already underway. In June, New Jersey aerospace startup Orbit Beyond Inc. confirmed plans to locate a manufacturing/assembly facility in Port Orange where it will produce unmanned lunar landers for commercial use. The project is funded in part by a $97.7 million contract from NASA. A California developer also recently began touting plans to convert the Volusia Square shopping center near the Interstate 95/International Speedway Boulevard interchange into an aerospace research park called Space Square. Last month also saw the announcement at the Paris Air Show by high-tech communications company Arralis of its agreement to lease the last remaining available space at Embry-Riddle’s MicaPlex research complex in Daytona Beach. The Ireland-based company intends to eventually build a manufacturing-and-assembly plant in Florida, possibly in Volusia.

The MicaPlex opened in March 2017 on South Clyde Morris Boulevard just south of Embry-Riddle’s Daytona Beach campus. It is the first building in a planned 94-acre aviation/aerospace research park. The research park last year added a $10 million wind tunnel facility and this fall is set to welcome the opening of the first of three planned research hangars. The park today is home to 17 startups that have created 33 jobs paying an average of $60,000 a year, as well as 76 internship positions, said Ginger Pinholster, a spokeswoman for the university.

“The space industry in Florida is exploding, and Volusia County is going to be extremely important to Space Florida’s efforts (to draw aerospace companies to the Sunshine State),” said Mori Hosseini, Embry-Riddle’s board chairman. “Embry-Riddle is going to be the focal point, the pivot of everything happening and because it’s in Volusia County, it’s going to bring companies here,” said Hosseini, who also serves on the boards for both Space Florida and Enterprise Florida. Keep Reading…

Business and Employment Opportunities

SARASOTA BRADENTON INTERNATIONAL AIRPORT
SARASOTA MANATEE AIRPORT AUTHORITY
REQUEST FOR QUALIFICATIONS
FOR PROFESSIONAL ARCHITECTURAL
AND ENGINEERING SERVICES FOR
THE SRQ MAINTENANCE HANGAR PROJECT
RFQ-04-2019-SMH

The Sarasota Manatee Airport Authority (SMAA), henceforth referred to as “Authority”, is seeking professional services to provide design, permitting, bidding, and limited construction phase services to construct two maintenance hangars located near the intersection of 15th Street East and Tallevast Road. The two hangars will include approximately 20,000 square feet of hangar space, two 5,000 square foot office/classroom spaces, concrete aircraft apron, employee/student parking, and driveway connection to 15th Street East. Conceptual designs are included with this RFQ. The selected consultant shall design and permit through Manatee County (as required) for the site and building improvements. Deadline for Receipt of Proposal is August 7, 2019 at 2:00 P.M. (EST). For additional information, click here.

REQUEST FOR STATEMENT OF QUALIFICATIONS #19-007
Construction Engineering and Inspection Services for
Commercial Terminal Expansion
and Improvements Project Phase II

The Gainesville-Alachua County Regional Airport Authority (GACRAA) is seeking qualified consultants to provide Construction Engineering, Administration, Project Administration and Inspection Services for the Airports Terminal Expansion and Improvement Project. Construction is anticipated to begin November 2019. The work includes a 15,200 s.f. expansion of the terminal gate lounge, expansion of existing secure side restrooms, re-roofing the existing building, various HVAC improvements and replacements to the existing building as well as new flooring and other misc. improvements. Interested parties should send a formal, written request for a copy of the RFQ Package to:

Position: Airports Operations Supervisor
Salary: $54,119 annually
Closing: July 26, 2019
The Aviation Department which operates the Fort Lauderdale-Hollywood International Airport and the North Perry Airport is seeking qualified applicants for the position of Airport Manager in the Aviation Operations Division. This is advanced specialized work in the management of all activities related to Airside Operations and management at the Ft. Lauderdale-Hollywood International Airport (FLL). The Airport Manager for Airside Operations should possess a thorough understanding of Federal, State, and Local regulations pertaining to Airside Operations at a Large Hub Commercial Service Airport. Duties involve tenant, governmental, and vendor relations; procurement and competitive bidding of contracts associated with Ramp Control and ARFF agreements; participation in facility design and planning; contract negotiations & drafting; report preparation; budget preparation and oversight; coordination of tenant improvement projects; and inspections of county-owned facilities. This position requires significant interaction with airport stakeholders and will supervise assigned Aviation Department Staff. Click [here](#) for more information.

This is a highly professional senior position involves directing and managing the financial, accounting and budgetary functions for the Lee County Port Authority (LCPA). This position is responsible for managing and maintaining all financial, accounting and budgetary systems involving a large volume of transactions. Also responsible for processing and analyzing all financial records, requiring the applications of established financial and general accounting principles, theories and practices and the application of the specific requirement placed on accounting within a governmental unit. Click [here](#) for more information.

This position is a member of the Greater Orlando Aviation Authority’s Information Technology Leadership Team and has a broad range of responsibilities that include Network and System Architecture, Structured Cabling, Server, Network and Systems Administration. MCO’s systems span a 13000+-acre campus that includes the North Terminal Complex, outbuildings as well as the South Terminal Complex currently under construction. Specifies, designs, implements, and manages all data and voice networks, servers, storage and communications infrastructure of the Aviation Authority. Position will play a key role in the continued development of the GOAA network, server, storage, voice and data infrastructure.

Click [here](#) for more information on both postings.
